Two Articles of Importance by Sybel Edmonds That We Urge You To Read

The 9/11 Commission concluded in its Report that no one in the United States Government failed us prior to September 11, 2001. No one anywhere in the government was guilty of anything more than “a lack of imagination.” No one, not a single solitary bureaucrat or elected official, deserved punishment for any acts of negligence, even those acts which were intentional or which contributed directly to the ‘success’ of the terrorist attacks.

When the Commissioners issued their verdict revealed that the Democrats and the Republicans, the Clintonites and the Bushies, had wanted a cover up and the Commission delivered what was ordered.

Part of what the Commission concealed is exposed in two articles that are linked on the 911 FSA website. These were written by Sybel Edmonds, a former language specialist for the FBI who was fired for wanting to blow the whistle on Bureau failures that contributed to 9/11.

For those who want to get a better idea of why the government of the United States no longer functions for the benefit of its people and how it has been corrupted these articles are essential reading.

It's the policy of 9/11 FSA to be specific when discussing those responsible for the breakdown in our government that made possible the murder of our loved ones. Ms Edmonds is equally straight forward.

Her articles are on the website of the National Security Whistleblowers Coalition. The links are below:

THE HIGHJACKING OF A NATION BY Sybel Edmonds

Part 1: The Foreign Agent Factor
