## **IMPORTANT ANNOUNCEMENT: 9/11 FSA NOW INVITES ALL VICTIMS AND FAMILIES OF ALL VICTIMS OF CRIMES COMMITTED BY ILLEGAL ALIENS TO JOIN US AS FULL MEMBERS.**

Since 2002, 9/11 Families for a Secure America has lobbied in Washington and the capitals of our states demanding that officials do what is essential to prevent terrorism: secure our borders to keep out terrorists like the nineteen savages who murdered our loved ones. We have been among the most persistent of voices in forcing reluctant politicians to face the simple fact that all nineteen of the hijackers were illegally in the United States and that if America had enforced its immigration laws these mass murderers would never have been able to enter our country and kill 3000 innocent people. Because of inaction by the President and Congress, and state and local officials, our country remains wide open to terrorists.

In our work we have spoken on behalf of those of our family members who died on September 11, those who escaped and those who sacrificed their health to act as first responders in the burning ruins of the World Trade Center and the Pentagon. However, every year thousands other illegal aliens not with no connection to Moslem terrorist groups inflict more death and injury on Americans than were killed by the illegal aliens responsible for the September 11 atrocities. Because these illegals kill or injure their victims individually, their crimes do not make headlines. Nevertheless, the fact is that the death and injury inflicted by illegal aliens in violent crimes on the streets of the United States dwarfs the total number of those murdered by Al Qaeda on September 11.

Every single year, thousands of innocent Americans are killed in intentional murders and vehicular homicides committed by illegal aliens. Rape, violent assault, control of neighborhoods by violent gangs, drug manufacture and distribution, are committed by illegal aliens at a far higher rate in the US than by citizens and legal immigrants. Many politicians from both of the two major parties, both conservatives and liberals, refuse to stop this illegal invasion.

Recognizing the huge numbers of victims of crimes by illegals, the power of the illegal alien lobbies, and the pressing need for a united front to oppose these lobbies, 9/11 FSA now opens its membership to all those who have been the victims of violent crimes committed by illegal aliens.

This expansion of membership will accomplish several things. One: it will give victims of such crimes and their families an organization whose members share the same grief and for similar reasons. Two: because the problem of illegal alien crime is now so vast and widespread 9/11 FSA will have a far larger number of potential members. Sadly, that number increases each day. Third: 9/11 FSA will be able to establish a membership base in each of the fifty states, while today our strength is concentrated in the Northeast.

For the foreseeable future 9/11 Families for a Secure America will retain its current name which is now so well known among our supporters and our opponents.

9/11 FSA renews its promise to President Bush, Members of the US Congress, governors and other state and local officials that our members will make sure that the public understands that it is their refusal to stand up to the illegal alien lobby that has resulted not just in the murders of 9/11 but in the continuing daily assault on the sovereignty and safety of the American people.

Our message is simple. Open borders bring chaos and violence to the United States. Amnesty, even if called a "path to citizenship" will result in more dead Americans. We know that most officials already know these facts. Our promise is to make certain that the people of this country have a unified voice to end this reign of terror.
